HEALTH OFFICER'S REPORT.

To the Honorable the Board of Supervisors

Of the City and County of San Francisco :

GENTLEMEN : I herewith transmit my report of the affairs of this office for the fiscal year terminating June 30th, 1887.

During the year there were 5,359 deaths, against 5,322 the preceding year.

Estimating our population at 300,000, the annual ratio of deaths was 17.86, against 18.8 per 1,000 of the preceding year.

Estimating the Chinese population at 22,000, the annual ratio of deaths per 1,000 was 22.18, against 21 of the preceding year.

Estimating the population of other nationalities at 278,000, the annual ratio of deaths per 1,000 was 17.10, against 18.8 of the preceding year.

I am warranted in estimating our population at 300,000 by the number of school children, the number of registered voters, the number and character of the houses constructed during the year, as well as by the estimate of others who have given the subject much attention.

The causes of death were :

From Zymotic diseases	810
From Constitutional diseases	1,056
From Local diseases	2,143
From violence	272
From unascertained causes (Chinese)	355
From unascertained causes (other nationalities)	149
(Unascertained includes death from natural causes.)	
From developmental diseases	574

Among the more prominent causes of death were: Diphtheria, 247; Typhoid Fever, 145; Phthisis, 738; Pneumonia, 300; Diseases of the Heart, 289; Encephalitis, 129; Apoplexy and Paralysis, 224, Violence, 280.

The following table will show the number of deaths from Diphtheria during the last eleven years:

Terminating June 30, 1877	911
Terminating June 30, 1878.....	332
Terminating June 30, 1879.....	169
Terminating June 30, 1880.....	69
Terminating June 30, 1881.....	39
Terminating June 30, 1882.....	102
Terminating June 30, 1883.....	102
Terminating June 30, 1884.....	51
Terminating June 30, 1885.....	213
Terminating June 30, 1886.....	218
Terminating June 30, 1887.....	247
Total	2,453

This is a fearful mortality to occur from a single disease usually considered preventable. It is due, in my opinion, to the disgraceful condition of our drainage system, particularly south of Market street. This portion of the city is the hot-bed which propagates this disease, and from which the germs are transplanted to other localities. I desire to refer you to my recommendations in regard to these conditions in my former reports.

San Francisco has never been in a more prosperous condition than we find it to-day. The best evidence of this fact is, that the mechanic and laborer have no difficulty in finding employment at more remunerative prices than for many years.

The continued construction of cable roads, not only giving employment during their construction, but affording employment for vast numbers after their completion; the construction of the Union Iron Works; our various canning factories, added to other great industries, have advanced the prosperity of the city to an extent which was not anticipated a few years ago. It is this prosperity which has, more than any other cause, awakened the intelligence of the city to the importance of sanitary reform. The lethargy which has characterized our administration heretofore ought not hereafter to be tolerated by the citizens of San

Francisco. The Press, and the intelligence of the city generally, demand that San Francisco shall be no longer cursed with disgraceful streets, sidewalks, and disease-breeding elongated cess-pools, miscalled sewers.

It is true, our death rate is less than that of most cities of the same population, yet the above table shows that Diphtheria is a fixed disease here—more so than in any other city. Our mortuary report also shows that of the 247 deaths from Diphtheria 240 were under 20 years of age. This cold statement of a fact, that a certain number of deaths were caused by any disease during the year, tells not of the distress and suffering caused thereby, of the loss of entire families of children; of the blasted hopes and utter despair of parents, who continue to live with nothing to live for, their hearts pierced by arrows of mourning, distress and unutterable woe. These deaths occur, not among the old and decrepid, whose life of usefulness has passed away forever but, as the statistics show, it seeks for its victims those under the age of 20, without regard to sex or condition—those whose lives of usefulness are just beginning, and upon whom the future prosperity of San Francisco so much depends. No one, except were absolutely ignorant of the condition of affairs, will suppose that the drainage system of this city can ever be reconstructed properly by ordinary taxation. The issuance of bonds is absolutely necessary, and nine-tenths of the taxpayers, in my opinion, would so vote if they believed the money would be honestly and economically expended. To pay the interest on these bonds would cost less money than now expended in the construction and reconstruction of sewers and the improvement of streets.

It must be remembered, also, that a great deal of the work which is now done must, in the near future, be thrown away. A brick sewer is frequently constructed to replace an old and decayed wooden one, but, the fall being insufficient, you are frequently substituting an elongated cesspool made of brick instead of wood.

This whole matter, as I have been recommending for eleven years, should be under the control of some eminent sanitary engineer.

I refer you to my former reports, as far back as the fiscal year terminating 30th of June, 1877, for further information. I cannot, however, leave this subject without again insisting upon the continuance of Brannan-street sewer to the Channel-street sewer, and the extension of the streets from Potrero avenue to San Jose avenue to Army-street sewer.

For the urgent reasons which make these two improvements so important, I refer you to my former reports.

The percentage of deaths from diphtheria was.....	1.58
The percentage of deaths from phthisis was.....	13.69
The percentage of deaths under 5 years was.....	27.6
The percentage of deaths in public institutions was.....	20.13

The causes of the large number of deaths from Phthisis has so often been explained that it is not necessary to repeat them here. Those interested can find them in former reports.

SMALL-POX.

On February 23, 1887, a white man, who arrived from Texas a few days before, was reported as having Variola. The case was verified by me, removed immediately to the Twenty-sixth street Hospital, and all necessary precautions taken. No other case occurred.

On May 3d a Chinaman was reported on the City of Sydney. He was removed to hospital.

On the 4th of this month a Custom-house officer, an Inspector of Chinese steamers, was also reported, and removed to hospital.

The next case reported was a 'longshoreman, who worked on the China steamers. He was removed also.

During the months of May and June there was verified sixteen other cases, which were sent to the hospital.

All of these cases were traceable to the same source. Other cases will no doubt occur; but I have no fear of an epidemic. Isolation, vaccination with bovine virus, thorough fumigation and destruction of infected clothing, bedding, and other articles, when necessary, I am satisfied will control the disease.

We have had so little small-pox in the last six or seven years that a little scare, such as is prevailing at present, will not be

without its benefits. I can see the effect of it daily by the increased amount of vaccination at the Health office.

Careless parents, whose children are under the school age, and whose vaccination has been delayed, are coming in increased numbers daily. Derelict teachers, who have failed to require from the children under their care certificates of vaccination, will now become alarmed, and where the neglect has occurred it will soon be remedied.

It gives me great pleasure to reiterate my entire confidence in the absolute protective power of bovine virus against an attack of small-pox. Since its introduction here, in May, 1877, there has not been a single case of varioloid after successful vaccination with bovine virus, notwithstanding thousands of exposures, particularly during the epidemic of 1876 and 1877, and that of 1880.

Those interested in this subject I would refer to my report published in Municipal Reports of the fiscal year terminating June 30, 1877.

The propositions laid down therein have never been controverted, and have lost none of their force with longer experience.

How to dispose of the garbage of the city is a question of great importance, and one which must demand your immediate attention.

The Harbor Commissioners have refused to permit the dumping of garbage into the Bay by means of scows. There are only two methods left from which you must choose—cremation, or its removal to the country for fertilizing purposes. Both are expensive. Cremation is rapidly gaining favor for sanitary reasons, both in this country and England. If not found too expensive, in my opinion it should be adopted. It is said to be in successful operation in several cities in this country, in Canada and in England.

Our record of deaths and marriages are believed to be absolutely correct. The record of births is so deficient that it is worthless for statistical purposes. The same complaint comes from the Health Department of other States. The enforcement of existing laws is simply impossible, as has been suggested. Full and reliable statistics would be obtained by the appoint-

ment of a Collector of Statistics, whose duty it should be, at stated intervals, to visit those now required by law to make reports of births, and obtain the desired information.

Accompanying this report, please find the reports of the Quarantine Officer, City Physician, a Financial Report of the Secretary of the Department, as well as other officers immediately connected with this office.

We are again under obligations to the officers of the Signal Service for the valuable meteorological and barometrical observations transmitted with this report. My thanks are also due to Chief of Police Crowley, who has furnished a force, by request of the Board of Health, to aid in improving the sanitary condition of the city.

Respectfully, your obedient servant,

J. L. MEARES, M. D.,

Health Officer

Of the City and County of San Francisco.

MORTUARY STATISTICS.

REPORT OF PLUMBING AND DRAINAGE INSPECTOR.

SAN FRANCISCO, July 1, 1887.

To J. L. Meares, M. D.,

Health Officer of the City and County of San Francisco:

SIR: I herewith present the following report as Inspector of Plumbing and Drainage for the fiscal year ending June 30, 1887.

During the past year I have issued permits for plumbing and drainage for one thousand and sixty-seven (1,067) buildings, showing a decrease of two hundred and thirty-four (234) as compared to the number issued last year. The principal decrease is in the number of private residences, which shows one hundred and fifty (150) less than the year 1886. I have received eight hundred and forty-five (845) plans, showing the plumbing and drainage of one thousand and sixty-seven (1,067) buildings, a decrease of one hundred and fifty-five (155) plans from the number received last year.

I have made one thousand and seventy-nine (1,079) first inspections, and one thousand and eighty-one (1,081) final inspections. The latter includes a number of buildings in course of erection but not complete when I made my last report.

The following classification will show the purpose for which the buildings were erected:

Private residences.....	529
Apartment houses for two families (flats).....	169
Apartment houses for three families (flats)	30
Apartment houses for four families (flats)	6
Apartment houses for six families (flats).....	4
Apartment houses for eight families (flats).....	1
Factories.....	8
Private schools.....	1
Churches.....	3
Boarding-houses or hotels.....	5
Society halls.....	1
Laundries.....	2
Stores.....	17
Stores and dwellings.....	127
Stores and ware-houses.....	6

Stores and offices.....	11
Stores and lodging-houses.....	30
Stables and dwellings.....	4
Stables.....	3
Hospitals (private).....	3
Theatres.....	1
Public bath-house.....	1
Ware-houses.....	5
Alterations and additions to old buildings.....	100
Total.....	1,067

Yours respectfully,

J. E. SWEENEY,
Inspector of Plumbing and Drainage.

REPORT OF ASSISTANT PLUMBING AND DRAINAGE INSPECTOR.

SAN FRANCISCO, July 1, 1887.

To J. L. Meares, M. D.,

Health Officer of the City and County of San Francisco:

SIR: I herewith respectfully submit my report as Assistant Inspector of Plumbing and Drainage for the year ending June 30, 1887.

I have during said period inspected thirty thousand and six hundred (30,600) feet of iron-stone pipe, laid as house-drains inside of building lines, and fourteen thousand six hundred and twenty-nine (14,629) feet of cast-iron pipe, laid as house-drains inside of building lines.

I have also examined the setting of six hundred and eight (608) traps, as set under sidewalks inside of curbs.

Yours respectfully,

JAMES J. BYRNE,

Assistant Inspector Plumbing and Drainage.

REPORT OF TWENTY-SIXTH STREET HOSPITAL.

To J. L. Meares, M. D.,

Health Officer of the City and County of San Francisco:

SIR: I have the honor to offer my report of cases treated in the Twenty-sixth Street Hospital for the fiscal year ending with June 30, 1887.

Number of patients remaining on hands at the date of last report.....	2

Natives of China.....	2
Natives of Ireland.....	2

All of which is very respectfully submitted,

J. E. PELHAM, M. D.,

Resident Physician Twenty-sixth Street Hospital.

Dated June 30, 1887.

REPORT OF QUARANTINE OFFICER.

SAN FRANCISCO, June 30, 1887.

To J. L. Meares, M. D.,

Health Officer of the City and County of San Francisco:

SIR: I have the honor to submit the following report for the fiscal year commencing July 1, 1886, to June 30, 1887, comprising tabulated statement of the number of vessels entering this port subject to quarantine dues. Also the amount received as fees, which sum I handed over to the Treasurer of the City and County of San Francisco, together with expenses incurred in this department for the year.

Nine vessels were quarantined and eight cases of small-pox was removed from six of them to the Twenty-sixth Street Hospital for treatment. At a regular meeting of the Board of Health, held December 16, 1886, "That owing to the prevalence of cholera in South America, that ports in direct communication with San Francisco, particularly those of Chili and the Argentine Republic, be declared infected, and that the Quarantine Officer be directed to quarantine all vessels arriving from such ports."

In compliance with this resolution, I found it necessary to place in quarantine four vessels. They were thoroughly disinfected and released. There were no cases of a contagious nature on these vessels.

Twenty thousand three hundred and ninety passengers entered this port by sea during the year, of which number 14,378 were alien immigrants, 3,952 were citizens of the United States, and 2,060 were Chinese in transit for foreign countries.

Six passengers died on the voyage.

The following shows number of vessels that entered this port during the fiscal year subject to quarantine fees, the amount received, and receipts:

YEAR.	MONTH.	NO. OF VESSELS.	DUES.	RECEIPTS.
1886	July.....	83	\$517 50	\$517 50
1886	August.....	98	535 00	535 00

Traps put in.....	54	

Very respectfully

J. GANS,

Health Inspector District No. 6.

CITY PHYSICIAN'S REPORT.

OFFICE OF THE CITY PHYSICIAN,
SAN FRANCISCO, August 1, 1887. }

*To the Honorable the Board of Supervisors
Of the City and County of San Francisco :*

GENTLEMEN: In compliance with Resolution No. 19,581 (New Series), I have the honor to submit for your consideration my eleventh annual report for the fiscal year ending June 30, 1887.

The House of Correction and County Jail have maintained a very good sanitary condition for the past year. Most of the cases there treated by me were contracted by the patients prior to their admission to those institutions. To the zeal and efficiency of the officers of both institutions is largely due the state of general health of the inmates. The predominant diseases were: Syphilis, gonorrhoea, rheumatism, bronchitis, consumption, alcoholism.

The number of indigent sick applying daily for treatment at my office is increasing, and my time is largely occupied in visiting the sick poor in their homes.

The number of autopsies have been materially increased (42 last year to 95 this year.)

Cases attended in the House of Correction.....	1,907
County Jail.....	1,210
Indigent sick.....	2,799
City Receiving Hospital.....	2,341
Total.....	8,275

The total cost for food for 1886 and 1887 was.....	\$21,908 51
Daily number of employees and inmates was.....	636
Daily cost per inmate and employee for food was.....	09½
The total cost for clothing, dry goods, shoes, hats, bedding, etc., was.....	\$6,701 52
Daily average number of inmates was.....	613
Daily cost per inmate for the above articles was.....	03
The total cost for the year for light was.....	\$942 75
Daily cost for light for the three buildings was.....	2 58

There are 66 burners lit in the institution every night, all of which burn until 8 o'clock, and 32 burn all night.

According to the Auditor's report, the total amount paid out for 1886 and 1887, exclusive of the sums disbursed on account of the new building, was \$62,586 04; deducting therefrom the amount paid into the City and County Treasury, realized from sales of stock, etc., viz: \$1,561 94, leaves the actual disbursement \$61,024 10.

The daily average number of inmates was.....	613
Daily cost for the institution.....	\$167 19
Daily cost per inmate.....	27½
Yearly cost per inmate.....	99 55

The following is a resume of the work done in the different departments during the year :

TAILORING DEPARTMENT.

Men's cassimere coats made.....	135
Men's cassimere pants made.....	205
Men's blue jean overalls made.....	275
Boys' blue jean overalls made.....	60
Boys' blue jean blouses made.....	60
Boys' cassimere suits made.....	20
Men's flannel overshirts made.....	616
Men's flannel undershirts made.....	512
Men's flannel drawers made.....	61
Boys' flannel overshirts made.....	54
Number of coats and jackets repaired.....	175
Number of pants repaired.....	260
Number of overalls, vests, etc., repaired.....	180

SHOE DEPARTMENT.

Men's shoes made, pairs.....	354
Boys' shoes made, pairs.....	26
Women's shoes (bought) pairs.....	96
Girls' shoes (bought), pairs.....	48
Boys' shoes (bought), pairs.....	84
Children's shoes (bought), pairs.....	60
Slippers (bought), pairs.....	120
Men's and boys' shoes repaired, pairs.....	486

WOMEN'S DEPARTMENT.

The female inmates have made all the clothing required by them, and have made and delivered during the year, 150 dresses and about 800 other garments, besides all the sheets, slips, spreads, ticks, etc., required by the institution. During the past year they have also made for use in the new building, 1,100 sheets, 750 slips, 350 bed ticks, 350 pillow ticks, 350 spreads, 200 window shades and 100 roller towels. They have also repaired about 16,000 pieces belonging to themselves and the male inmates.

FARM.

	ACRES.	RODS.
House, lot and grounds.....	5	
New Building, lot and grounds.....	5	
Hospital lot, grounds and roads.....	4	129
Pasturage.....	15	
Potatoes.....	20	
Barley for hay.....	22	31
Vegetables.....	8	
Total.....	80	

LIVE STOCK.

Horses.....	13	Calves under 12 months old.....	50
Cows.....	79	Hogs.....	43
Bulls.....	1	Pigs.....	43
Heifers.....	1	Chickens.....	80
Total.....			310

ESTIMATED CROPS.

Potatoes.....	70 tons, 140,000 lbs
Hay.....	65 tons, 130,000 lbs
Vegetables.....	40 tons, 80,000 lbs

AMOUNT RECEIVED FROM SALES OF STOCK, ETC.

Received from sale of 65 calves.....	\$1,042 00
Received from sale of 27 hogs.....	279 37
Received from sale of kitchen grease.....	166 90
Received from sale of bones.....	73 67
Amount paid into the City and County Treasury.....	\$1,561 94

ALMSHOUSE REPORT.

75

I have also received from the State of California during the year the following sums "for support of aged persons in indigent circumstances," and for support of orphan, half-orphan, and abandoned children, and have paid the amount into the City and County Treasury :

Received from State of California for support of aged persons in indigent circumstances for half year ending June 30, 1886.....	\$14,930 29	
Received from State of California for support of orphan, half-orphan, and abandoned children, for half-year ending June 30, 1886.....	617 53	
Amount paid into the City and County Treasury.....		\$15,547 87

COST OF THE ALMSHOUSE NEW BUILDING AND FURNISHING THE SAME FOR THE ACCOMMODATION OF 350 INMATES.

Architect's services.....	\$1,433	
Erection of building.....	40,965 00	
Extra work.....	875 46	
Sewer pipe.....	297 64	\$43,571 87
Furniture.....	1,265 50	
Blankets, ticks, sheeting, spreads, etc.....	2,306 11	
Fire hose and blunderbusses.....	1,585 50	
Kitchen and dining-room utensils.....	643 20	
Crockeryware.....	213 50	
Lumber for tables, etc.....	165 30	
Hardware.....	31 50	6,210 61
Water tower with 3 tanks.....	1,975 00	1,975 00
Total.....		\$51,757 48

REMARKS.

From the foregoing figures it will be seen that the expenses of the institution will compare more than favorably with any former year of my administration. The cost for food has been less than ever, every article of which has been closely inspected on delivery, and if found unsatisfactory has been returned and exchanged for the best.

The appropriation for Alms House expenses for 1886 and 1887 was \$70,000. The amount actually paid out from the City and County Treasury was \$61,024 10; consequently there was a surplus of \$8,975 90 remaining at the close of the fiscal year.

While economy has at all times been my aim, the comfort and well-being of the inmates has never been lost sight of.

All the inmates, both male and female, who were able to work have been employed, their labor being utilized wherever it could be most useful. Not more than one third of the inmates admitted are capable of performing manual labor.

These have been employed upon the farm, on the roads, in the gardens and grounds, buildings, stables, etc. Others have been employed as painters, whitewashers, carpenters, herders, milkers, etc., etc. Wherever repairs were required on the buildings or in the grounds, they have received prompt attention, the work costing the city nothing, except for material used.

The sanitary condition of the three buildings has received constant care. Sewers have been flushed weekly, disinfectants freely used, and every room thoroughly scrubbed with soap and water at least once a week, so that at all times the House has been sweet and clean.

The roads in the neighborhood of the institution have been kept in good condition, the grounds surrounding the new building have been graded, and the walks and drives macadamized.

Among a variety of other work done in and around the new building, 1,300 feet of iron-stone sewer pipe have been laid, and 700 feet of galvanized iron pipe for irrigating the grounds.

The crops on the farm this season have been a fair average, the potatoes having done remarkably well, many single potatoes weighing 2 lbs. and over, and of first-class quality. Our milk supply has been ample, from which a large portion of the butter used in the institution has been made. The gardens have produced an abundance of table vegetables of superior quality.

In my last annual report I stated that I had received \$61,073 69 from the State under the "Act to appropriate money for support of aged persons in indigent circumstances." Since then I have received, under said Act, the further sum of \$14,932 20, and \$617 58 under the Act of 1880, to appropriate money for support of orphan, half orphan, and abandoned children, making the total amount received from the State under these two Acts, to date, \$88,606.17, the whole of which has been paid into the City and County Treasury.

There is now due from the State, under said laws, for the year ending June 30th, 1887, the sum of \$32,312.46.

For several years past, the institution having been overcrowded with inmates, with the prospect of a gradual increase in the number seeking admission, and also with the view of relieving the City and County Hospital of its incurables and convalescents, it became evidently necessary to increase the accommodations of the House.

Having received from the State \$61,073.69 in one sum, I deemed this a favorable opportunity for the erection of an additional building, and succeeded in impressing the Honorable Board of Supervisors with its necessity; they therefore appropriated the amount required from the said money.

The new structure is situated on high ground, about one hundred yards north of the main building, and in clear weather commands a splendid view of the Golden Gate and the Pacific Ocean. It is of three stories, of slightly appearance, complete and convenient in all its appointments, and capable of comfortably accommodating three hundred and fifty inmates.

The building was opened April 4th, on which date the first installments of patients from the City and County Hospital were received. That institution has been relieved of one hundred persons in the last three months. The cost of the building, and furnishing the same for the accommodation of three hundred and fifty inmates, has been, according to the Auditor's figures \$51,757.48.

Religious services at the institution have been held as usual, and my thanks are due to the Rev. Father Brennan and the priesthood of the Mission Dolores Church, who have been unremitting in their attention to the Catholic portion of the inmates.

My thanks are also tendered to Mr. Andrews and the Rev. E. J. Lion, pastor of St. Stephen's Episcopal Church; also, to the Rev. James Campbell, and the ladies of the Young Women's Christian Association, for their devotion to those of the Protestant faith.

I wish also to thank the ladies of the San Francisco Fruit and Flower Mission for their kind visits to dispense fruit and flowers among the sick inmates.

To all other kind friends who have made donations of books, papers and periodicals for use of the inmates, I tender my sincere acknowledgments, at the same time assuring them that their kind thoughtfulness has been duly appreciated by a class of poor people whose chief enjoyment is reading, being, from physical ailments, incapacitated from work.

My thanks are also due to all who helped to contribute so bountiful a supply of toys and candy for the Alms House children at Christmas. Could they have seen the little ones in the enjoyment of their bounty, they would have been amply repaid.

From the opening of the Alms House to the present time, 9,736 inmates have been admitted and provided with a comfortable home, through the generous charity of the people of the City and County of San Francisco.

In conclusion, allow me to say that, having performed my duties conscientiously, I hope and trust my efforts have met your approval.

Sincerely thanking your Honorable Body, and the Hospital Committee of the Honorable Board of Supervisors, for your, and their, kind support and co-operation, this report is most respectfully submitted.

M. J. KEATING,

Superintendent City and County Alms House.

San Francisco, July 1st, 1887.
